

SOCIETY DIRECTORY.

A cordial invitation is extended to strangers who belong to any of these organizations to visit meetings when in town.

OXFORD LODGE, F. & A. M. No. 18, meets in Masonic Hall, Friday evening, on or before full moon. George L. Curtis, W. M.; Howard D. Smith, Secretary.

OXFORD ROYAL ARBOR CHAPTER, No. 29, meets in Masonic Hall, Wednesday evening, on or before full moon. G. E. McArthur, H. P.; Geo. E. Talbot, Secretary.

OXFORD COUNCIL, No. 14, R. & S. M., meets in Masonic Hall, Friday evening, after the full moon. P. M. Walker, T. L. M. Chas. F. Barnes, Recorder.

OXFORD LODGE, No. 1, Ark Mariners, meets in Masonic Hall, Wednesday after the full moon. Edwin Richardson, Ven. Pat; Morton L. Kimball, Secretary.

NORWAY LODGE, No. 16, I. O. O. F., meets in their hall every Tuesday evening. Luther Fred Pike, N. G.; Morton L. Kimball, Sec'y.

WILDER ENCAMPMENT, No. 21, I. O. O. F., meets in their hall the second and fourth Friday evenings of each month. Clarence V. Webber, C. P.; Morton L. Kimball, Sec'y.

Mr. Hope R. Barnes, No. 28, I. O. O. F., meets in Odd Fellows' Hall the first and third Friday evenings of each month. Bertha Evans, N. G.; Eva M. Kimball, Sec'y.

PENNSYLVANIA LODGE, No. 18, K. of P., meets in their hall, Bathway Block, every Thursday evening. Frank M. Lovjoy, G. C.; W. A. Lewis, K. of R. & S.

LAKE TEMPLE, No. 45, F. S., meets in Friban Hall the second and fourth Friday evenings of each month. Martena Richardson, M. E. C.; Annie Heath, M. R. C.

OXFORD CASTLE, No. 1, K. G. E., meets in Ryerson Hall, every Thursday evening, Sept. 10 to May 1, first and third Thursday evenings of each month. L. E. Noyes, Pres.; Clara I. Jordan, Sec'y.

HARVEY ROSE POST, No. 24, G. A. R., meets at G. A. R. Hall, the first Tuesday evening in each month. S. L. Etheridge, Commander; Fred Young, Adjutant; M. E. Kimball, Sec'y.

HARVEY ROSE, W. R. C., No. 45, meets in G. A. R. Hall, first and third Thursday evenings of each month. L. E. Noyes, Pres.; Clara I. Jordan, Sec'y.

LAKEVIEW LODGE, No. 177, N. E. O. P., meets at G. A. R. Hall, the first and third Wednesday evenings of each month. Mrs. E. M. Brock, Warden; Ada A. Libby, Secretary.

NORWAY CAMP, No. 10388 M. W. of A., meets at Ryerson Hall, every Wednesday evening. Nathan Tompkins, Consul; F. E. DeCoster, Clerk.

NORWAY ANCHOR LODGE, No. 33, I. O. G. T., meets in Golden Eagle Hall the first and third Monday evenings of each month from June to October, and every Monday evening until the following June. Emma Stone, C. T.; Mildred Kelley, Secretary.

MYSTIC LODGE, No. 101, A. O. U. W., meets second and fourth Monday evenings of each month at G. A. R. Hall. D. F. Delia, M. W.; John F. Mason, Financier.

NORWAY SAVINGS BANK, MAIN STREET, NORWAY, ME. Money loaned on good security at reasonable rates.

Rheumatic Folks.

Are You Sure Your Kidneys are Well?

Many rheumatic attacks are due to uric acid in the blood. But the duty of the kidneys is to remove all uric acid from the blood. Its presence there shows the kidneys are inactive.

Don't dally with "uric acid solvents." You might go on till doomsday with them, but until you cure the kidneys your will never get well. Doan's Kidney Pills not only remove uric acid, but cure the kidneys and then all danger from uric acid is ended. Here is a Norway testimony to prove it.

Mrs. Solon Moore, living on Tucker St., Norway, Me., says: "About five years ago I was troubled with kidney complaint and attacks of rheumatism. My whole body seemed to be affected, and during the spells the secretions from my kidneys were very sluggish in action and otherwise disordered. I used many remedies of different kinds but received no benefit. I at last procured Doan's Kidney Pills from Stone's Drug Store, and they proved to be excellent. My husband has also used Doan's Kidney Pills with good results, and we are both pleased to give this preparation our highest endorsement."

For sale by all dealers. Price 50 cts. Foster-Milburn Co., Buffalo, New York sole agents for the United States.

THE LAST ACT.

Now Tousehead is fixed for bed

And, following her habit, Darts in and out with romp and shout With no more than a rabbit On her wee form to keep her warm.

But garment she needs to be And such as she need not to be Clothed any more than Cupid.

At least at night for pillow fight And rush and roll and fumble Such things as clothes and shoes and hose

Just help one to a tumble, And, though she felt no grief at all Comes to her where she's wriggling. She gives a roll—God bless her soul!— And up she scrambles giggling.

And very soon to lulling croon, In her pink nightie smothered, She'll softly creep, almost asleep, To a lap to be mothered.

And, snuggled down for Slumbertown My whole body seemed to be affected, and during the spells the secretions from my kidneys were very sluggish in action and otherwise disordered. I used many remedies of different kinds but received no benefit. I at last procured Doan's Kidney Pills from Stone's Drug Store, and they proved to be excellent. My husband has also used Doan's Kidney Pills with good results, and we are both pleased to give this preparation our highest endorsement."

For sale by all dealers. Price 50 cts. Foster-Milburn Co., Buffalo, New York sole agents for the United States.

ON A BUSINESS BASIS.

Very Practical Details In Profitable

Dairying. By JOHN MICHELLS, Clemson College.

Under average conditions a cow yielding twenty-two pounds of milk should have a ration composed of about two-thirds roughage and one-third concentrates. By a number of trial calculations we find that the required nutrients are approximately obtained by selecting six pounds of wheat bran, four pounds of cottonseed meal, eight pounds of corn stover and forty pounds of corn silage. For greater yields it is best, as a rule, to increase only the concentrates to meet the requirements of the additional flow of milk, thus making the proportion of concentrate to roughage greater the larger the yield of milk.

The main part of the ration should be supplied in two feeds, one in the morning and the other in the late afternoon. It is desirable to feed some roughage at noon, especially when the roughage in the morning and evening consists of silage. The cow, on account of her large stomach, the paunch, is capable of storing up a large quantity of feed and therefore does not require as many feeds as some other farm animals.

Concentrates and Roughage. As a rule, it is best to feed the concentrates just previous to milking and the roughage immediately thereafter. The grain helps to attract the cows to their stalls, and by feeding the roughage after milking we avoid tainting the milk with undesirable odors when the roughage contains these. When corn silage, for example, is fed immediately before or during milking its odor is always perceptible in the milk. When fed after milking the odor is never detected. It is believed also that feeding the concentrates by themselves will result in a more thorough mixing of the saliva with them and thus increase their digestibility. Furthermore, a great deal of dust can be avoided by feeding the roughage after milking, particularly when the roughage consists of hay or dry fodder.

A prevailing opinion that heavy concentrates will form an injurious, pasty mass in the cow's stomach does not seem to be well founded. When the concentrates are fed directly before milking and the roughage directly after there will be sufficient mixing in the paunch before the contents pass into the stomach proper. The writer for several years has successfully followed the practice of feeding concentrates and roughage separately when the former consisted of as much as five pounds of cottonseed meal per day.

An average cow in full flow of milk will consume forty pounds of corn silage to good advantage. This amount of silage, combined with eight or ten pounds of dry fodder or hay, makes a good combination of roughage for a dairy cow.

Successful Feeding. In the economical production of milk it is absolutely essential to feed cows according to their capacity. Just what this productive capacity is can be determined only by keeping a careful account of the feed consumed and the milk and butter fat yielded by each cow individually.

About half the nutrients called for in a ration for an average milker are used to sustain the body, so that it will neither gain nor lose weight, the other half being used to form milk. Returns for feed can therefore be expected only from about 50 per cent of the total nutrients required.

This means that a cow on a full ration will yield practically twice as much milk as she would on three-fourths of a ration. Yet there are thousands of dairymen who fail to supply the last quarter

USES FOR SPUN GLASS.

Clothing Made of It Would Be Incom-
bustible and Acid Proof.

That spun glass, long known as a
curiosity and more recently employed
in making ornaments or in decoration,
will come into wide use for other and
more practical purposes is prophesied
by E. Lemaire in La Nature.

In recent years the electrical and
chemical industries have made large
use of the valuable properties of glass.
In the electrical industry its noncon-
ductibility for heat and electricity has
been especially useful, in chemical labo-
ratories its great power of resistance
to reagents. Nevertheless the applica-
tions of glass seem not to have been
developed to the utmost, and in particu-
lar we have scarcely utilized at all its
property of being easily spun and of
thus entering into the formation of
textile fabrics.

Clothing made of such textiles would
be incombustible, nonconducting and
resistant to acids and would be per-
fectly insulating to electricity. Work-
men wearing it would be proof against
burns in the metallurgical industries
and against injury by acids in chemi-
cal works, and finally in the electri-
cal industries rubber gloves when
guarded on the outside by spun glass
coverings would absolutely prevent
death from electric shock. The present
use of spun glass fabrics is not wide,
but the cause should be sought in the
lack of information on the subject in
technical literature.

Very Unkind.

"What is the matter with your eye,
man?"

"A cross section of timber I was
sawing flew up and hit me."

"Must have been a mighty cross sec-
tion and ill tempered as well."

Fine for Kidneys.

Here is a simple home-made mixture
as given by an eminent authority on
Kidney diseases, who makes the state-
ment that it will relieve almost any case
of Kidney trouble if taken before the
stage of Bright's disease. He states
that such symptoms as lame back, pain
in the side, frequent desire to urinate,
especially at night, painful and discol-
ored urination, are readily overcome.
Here is a recipe. Try it:
Fluid Extract Dandelion, one-half
ounce; Compound Kargon, one ounce;
Compound Syrup Sarsaparilla, three
ounces. Take a teaspoonful after each
meal and at bedtime.
These ingredients are all harmless and
easily mixed at home by shaking well in
a bottle. This mixture has a peculiar
healing and soothing effect upon the en-
tire Kidney and Urinary structure, and
often overcomes the worst forms of
Rheumatism in just a little while. This
mixture is said to remove all blood dis-
orders and cure Rheumatism by forcing
the Kidneys to filter and strain from the
blood and system all uric acid and foul,
decomposed waste matter which cause
these afflictions. Try it if you aren't
well. Save the prescription. 6-9

Fixed.

"But," said the good old lady, "why
don't you go to work?"

"Why, ma'am," began the disreputa-
ble old loafer, "yer see, I got a wife
and five children to support."

"But how can you support them if
you don't go to work?"

"As I was a-sayin', lady, I got a
wife and five children to support me."

MAIN STREET, NORWAY, ME.

HOW IT HAPPENED.

Mr. De Swell: "You look like a victim of the liquor habit."

The Tramp: "Dat's right, boss, but it ain't no fault uv mine, I wuz driven
to drink."

Mr. De Swell: "Indeed! And did your wife drive you to it?"

The Tramp: "No, boss. It wuz me cooshaman."

ARMOR CLAD ANIMALS.

Natural Protective Devices Common
In Lower Forms of Life.

Armor is not an invention of man,
but merely a rough and ready copy of
protective devices in use among the
animals from time immemorial. In na-
ture are examples of almost every kind
of armor, ranging from the tough in-
tegrument comparable to the shields of
dile borne by the savage warrior to
veritable suits of mail, reminding us
of those worn by knights of the fif-
teenth century. Some animals even
resemble the modern battleship fully
equipped or the locomotive fort de-
scribed by the imagination of H. G.
Wells.

Starfishes, especially of the tropical
seas, giants measuring from fifteen to
twenty inches across, show us a type
of armor not unlike the tough em-
bossed shields characteristic of early
warfare. Their integument is hard-
ened by the presence of much calcare-
ous matter and studded with bosses of
the same hard material. Among sea
urchins we find the strong box again
predominating.

Lobsters and crabs are excellent ex-
amples of armor bearing animals. The
lobsters have wonderful coats of mail
suggestive of those devised by human
warriors in the age of chivalry. They
combine perfect security with ease of
movement owing to their jointed struc-
ture. Crabs have planned their faith to
the strong box type of protection, such
as is fashionable among the tortoises.
The manner in which crabs when at
rest tuck their legs beneath them so as
to bring them under the shelter of the
hard carapace is interesting. The crab
is doubly protected, for it resembles a
water worn pebble and thus looks like
the indelible objects by which it is sur-
rounded. Large fishes like the cod are
in the habit of swallowing crabs, shell
and all. In this case their armor is of
no avail, but they are protected by
their resemblance to the stone.

The pangolins of South America are
almost lizard-like in outline, clad from
head to tail in a suit of horny plates
like huge thick finger nails overlap-
ping each other as do tiles on the roof
of a house. The head terminates in a
long, narrow snout. Within this is the
sticky, wormlike tongue used with rap-
idity and effect when an ant hill is
raided.—Chicago Tribune.

STERILIZED WATER.

Micro Organisms Destroyed by Intro-
duction of Ozone.

Ozone is one of the most powerful
oxidizers, and advantage has recently
been taken of this fact in France in
an entirely novel manner. Drinking
water, as already stated, though pass-
ed through a lengthy cycle of filtering
and purifying operations, is yet ex-
tensively infested with micro organ-
isms. The latest development is the
introduction of a certain amount of
the gas into the water at the top, so
that when drawn the liquid is to all
 intents and purposes perfectly sterile.
The apparatus now in use in France
is very simple in construction and in-
expensive to install. Mounted on a
small panel some fifteen inches square
is a small ozonizer, comprising sheets
of glass covered with tin foil on one
side and freely perforated. A current
of air is drawn through these plates,
which is ozonized under the influence
of the electric current. The ozonized
air then passes into an inverted glass
bulb, into which the water is thrown
by the main pressure in the form of a
spray, and accordingly it combines
with the gas, which immediately seizes
on all bacteria present, destroying
them at once.

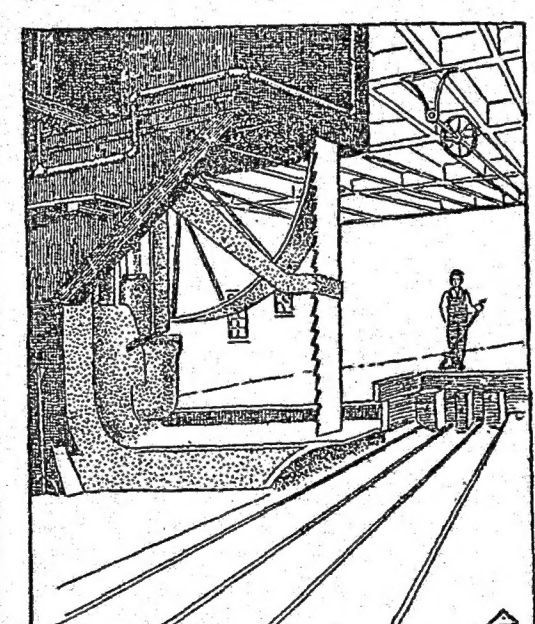

The water drawn from the top is
quite germ proof, while the addition
of the ozone imparts a delightful spar-
kle and an invigorating taste to the
liquid. The apparatus is very economi-

cal in operation, the ozonizer merely
being connected to the holder of an
electric lamp, while the simple task
of turning the tap sets the ozonizer in
action, switching off the current when
the supply is arrested. The electric
consumption is very small, one unit
sufficing for the sterilizing of a thou-
sand gallons of water.

The Largest Band Saw.

The largest band saw ever used is
twenty inches wide and sixty-five feet
long and has an eleven gauge with
teeth spaced three inches apart. It is
doing regular service in a lumber mill
at Houlton, Me.

The great element of success in the
use of such a huge saw is the vigi-

LONGEST SAW EVER MADE.

lance of the filer in examining it after
every run for development of "fast"
places. Only by this means can the
saw be kept in perfect condition, for if
it is left until poor work is shown it
may get beyond control and the entire
saw be ruined.—Wood Worker.

Carbon in Human Body.

The human body contains about
enough carbon to make 3,000 lead pen-
cils or to make enough coal to burn
nearly two hours.

THE BLOOD PRESSURE.

Instrument For Measuring Devised by
Scientists.

An instrument long needed by the
medical profession for measuring blood
pressure has been invented by
Dr. D. R. Hooker of Johns Hopkins
university and hospital and by J. A.
Eyster of the University of Virginia.
There have been various theories ad-
vanced for the measurements of venous
pressure, but all were more or less de-
fective.

The new instrument consists of a
small glass box containing a rubber
bag. This is attached to the wrists of
the patient directly over the vein. The
box is connected by a tube to a water
manometer, to which is attached a
rubber bulb. By squeezing this bulb
the pressure is exerted on the vein. When
the vein is seen to collapse the pres-
sure which is transmitted to the ma-
nometer may be read in centimeters of
water.

The Valuable Alligator.

The man of science has been study-
ing the alligator and has discovered
that every part is of some value. A half
grown specimen is worth far more in
money than the largest steat that was
ever separated into articles of com-
merce, even in a Chicago abattoir.
Take the teeth, for instance. They
are of such fine ivory that they can
be made into watch charms and other
jewelry, for they have a much brighter
luster and are as rich in tint as the
best tusks that ever came out of an
African elephant's head. The teeth
alone, says the Technical World Maga-
zine, are worth from \$2 to \$4 a pound,
according to size. Every square inch
of the hide makes a covering which is
far more durable and has a more at-
tractive finish than most leathers.

BLUE STORES

The Despised Ailanthus.

Among the very common trees, yet
almost totally unknown, is the much
despised, ill smelling ailanthus. A
million dollars could not buy a board
of any lumber yard, says Arboricult-
ture. The dealer or manufacturer of
lumber never saw it on sale and would
not recognize it if seen. Yet it is a
magnificent wood, resembling white
ash and capable of receiving a high
polish.

Fire and Water Proof Cement.

Mix ten parts of finely sifted un-
oxidized iron filings and five parts of
perfectly dry, pulverized clay with
vinegar spirit by thorough kneading
until the whole is a uniform plastic
mass. If the cement thus made is
used at once it will harden rapidly and
withstand fire and water.—Workstatt.

MERIT WILL TELL.

We will refund the money on one 25-cent box
of Lady Pore's Ointment if it fails to heal and
cure piles, salt rheum, eczema, open sores,
chafing, chapped hands and lips, blotches and
all eruptions and abrasions of the skin. We
only ask you to try one box to test its curative
powers. As all druggists and dealers, heavily

ONE DAY'S REO SHIPMENT TO WICHITA, KANSAS
 This Train Load of Reos was Shipped to the Wichita Automobile Company January 25, 1939, as a Result of the Brilliant Performance of the Reo on Road and Track and in Every Day Use During 1938, 1937 and 1938 in Wichita and Vicinity—Similar Other Large Reo Shipments Have Been Made, and Are Yet to be Made, in the Near Future in the South, North, East and West
 JOHN E. STEPHENS OF RUMFORD FALLS IS THE REO AGENT FOR OXFORD COUNTY

WEST STONEHAM.
 Beryl McKee came home from Norway, Thursday, and returned, Monday.
 Z. Fontaine is making extensive repairs in the upper story of his house.
 Lots of hard wood timber is being hauled into H. B. McKee's new mill.
 Wm. Gammon made a short visit to his daughter's, Mrs. Bertha Kenniston, of Lovell.
 Mrs. Maude McAllister and little son Stillman, of North Waterford, have visited her parents, Mr. and Mrs. J. C. Sawyer.

NORTH NORWAY.
 Herbert York is selling fresh fish, Flora J. Cummings is at home now.
 Mrs. Belle Hussey is at home just now.
 Cora Morgan is at work for C. D. Morse.
 Fannie Hunt, from Hebron, is visiting Mrs. F. A. Hunt.
 Russell & Harlick have finished sawing O. W. H. Judd's wood pile.
 H. E. Hussey is sawing wood for Geo. French, with his new gasoline engine.
 Fine weather for coasting, and Noble's Corner people, old and young, improved it the other day.
 Curtis' cream gatherer takes eggs of all who wish to dispose of them, and brings a check once a month.
 People up this way are glad Washington didn't have two birthdays. So many holidays and bad traveling, we go without the mail frequently.
 A village doctor returning from Greenwood, got his horse into the snow, near Swift's Corner, and had to be shovelled out. It was in the evening, and fortunate for him, help was nigh.

EAST WATERFORD.
 Nellie Keene has visited at P. H. Howe's.
 Mrs. Alice McIntire and daughter, went to Norway, Saturday.
 Alton Howe, Mrs. P. H. Howe and daughter Julia, went to Norway and attended Grange.
 C. H. Merrill visited relatives and friends in Norway and Paris, attending Lodge at Paris, Thursday evening.
 Alton Howe is having good success in the new business this winter. He recently got an egg that measured 6 1/2 by 7 1/2 inches and weighed four ounces.
 A general invitation is extended to all to attend the box-supper and entertainment at the Holt district school-house, Saturday evening, Feb. 27. Ladies please bring boxes.

EAST STONEHAM.
 Mrs. Nancy McAllister remains about the same.
 Raymond McAllister bought a cow of Will Allen.
 The Ladies' circle will furnish dinner tomorrow meeting day.
 David McAllister swapped horses with Dell Walker of Norway.
 Bert Kendall and Frank McAllister caught two foxes last week.
 John C. Files is at home from the Portland hospital and is gaining slowly.
 Bessie and Alice McKee of Norway visited their grandfather, Loris McKee, Sunday.
 John Grover of East Stoneham was at Charles Chaplin's Saturday. He is in the poultry business.
 Mrs. F. H. Bartlett went to Augusta Monday, February 15. Bertha Skinner of Waterford is caring for her children.

SUNDAY RIVER.
 Gladys Trask has been visiting Lillian Bean.
 C. D. Bean has been working for L. J. Trask, pressing hay.
 Marion Littlehale has been spending her vacation with her father, O. P. Littlehale.
 Agnes and Bech Foster spent the day with their grandmother, Mrs. Priscilla Foster.
 L. J. Trask's team has come out of the woods where it has been working for J. J. Spinney.
 It is a very pretty sight to see the little pony team driven by Gladys and Edwin Trask. They are not at all selfish, they drive around among their school-mat's giving them all advice.

UPTON.
 Will Brown has moved home from the woods.
 Mrs. E. E. Lane has returned from Errol where she has been visiting.
 Harry Brooks and wife of Boston are visiting his parents at Mettallus Island.
 Mrs. A. V. Morse has gone to Gorham to visit her sister, Lucie, who is attending the Normal school. She also plans to visit in Portland a few days.
 One of the articles in the warrant for town meeting is to "see if the town will vote to set a cedar slab at the head of the unmarked graves in Upton cemetery."
 The private wire from Mettallus Island and the farmers' line have been corded and the patrons of the farmers' line have enjoyed visiting the island by telephone.
 The fiercest snow storm of the season when during forty-eight hours it was estimated that from 18 to 24 inches fell. It is estimated that 28 inches fell at Errol, N. H.

Mary A. Rogers.
 After a long season of ill health caused by diabetes climaxed by a severe sickness of only two days, Mrs. Mary Ann Rogers, wife of the late Daniel Rogers, died Feb. 4th, at her home in Naples, where she was universally beloved, and of which she was a life long resident.
 She was a daughter of the late Smith Chaplin of Naples, and was born Jan. 26th, 1849. Of this family there survive three sisters and one brother, Mrs. David J. J. O'Neil, Samuel Chaplin of Harrison and Mrs. James Trafton of Westbrook.
 Funeral services were held at her home Sunday, Feb. 7th, conducted by Rev. Nye, and were attended by many of her friends and neighbors.
 She leaves five children to mourn the loss of a kind and loving mother, Dana and Lorton Rogers of Naples and Mrs. Frank Pitts of Naples, Edwin Rogers of Lewiston, and Mrs. Leslie Hobson of Waterford.

There was a profusion of beautiful flowers, consisting of a pillow with the word "Mother" thereon from her children, pinks, Mr. and Mrs. Edwin Rogers; calla lilies, Mr. and Mrs. Frank Trafton; pinks, Mr. and Mrs. James Trafton; a crocus from Mr. and Mrs. Howard Randall, and calla lilies from Mrs. Warren Chute. Interment at the Chute Yard in Naples.

PARIS HILL.
 "Old Acre Folks."
 A goodly audience greeted the drama, "Old Acre Folks," at Academy hall last Wednesday evening. The play was finely cast and given with the spirit which sways the audience and keeps the interest at the highest point from first to last.
 One thing which helped much was the entire absence of prompting which so often spoils the best effects of a play.
 The local items which Deacon Evans (Mr. Holmes) read from the evening papers (?) caused much laughter and not a little good natured chaffing later.
 A rather odd thing was that just half the actors were old friends of a Paris Hill audience, but the other five may be sure of as hearty a welcome when they come again, which let us hope will be soon. In fact so good a play, so well cast, staged and acted is a treat not often enjoyed.
 Between the acts Frank L. Starbird of Norway gave several humorous selections which were well liked.
 Quite a number enjoyed the dance which followed the play, with music by Mrs. Hammond and Mr. Davee.
 Ice cream and cake were sold during the evening, and let us hope the Grange was so well pleased that they will give us another entertainment soon. They will have a good and hearty greeting.

Annie Parris has returned from the C. M. G. hospital.
 Miss Eaton has been very ill for some days but is reported better.
 Miss Walker of South Paris was the guest of Mrs. G. M. Atwood over Sunday.
NORTH WATERFORD.
 Sumner Grover sold a horse to Frank Grover.
 Lucius Jewett is boarding at Henry Proctor's.
 Florence McKenzie is working for Amos Bean, at Albany.
 Roland Littlefield is working for Rolfe at East Waterford, in the mill.
 Mrs. P. W. Saunders has got home from Portland, where she has been for treatment.
 Mrs. G. E. Farmer is on the sick list. Eva McAllister is helping do her housework.
 Uncle George Hobson walked to the village and back home, Tuesday. He is 92 years old.
 Mr. and Mrs. John Kilgore, who have been visiting his brother Willis, here, have gone home.
 Guy Bancroft and Henry Elliott went fishing to the five Kezars and caught eleven pickerel, Tuesday.
 P. W. Saunders' white mare stepped into a hole and broke her ankle, so had to be killed. Hersey Saunders was riding her when the accident happened.
 Jess Littlefield and family are living in Mrs. Washburn's house. Mrs. Washburn, who has been boarding with Mrs. Parris Paige this winter, will board with them.

Frank Bryant and family, who have been stopping at Lovell the past week, have got back home. Mr. Bryant was doing carpentry work for his son-in-law, Henry McAllister.

Master Willie Littlefield met with an accident Sunday. He slid into the post of the mail box, striking his forehead on the edge of the box—cutting a gash which had to have four stitches taken. He is doing nicely.

Bischoctown.
 Little Mildred Nickerson was sick, Tuesday.
 Mr. and Mrs. Ishiah Hazeltine visited their son Fred, Tuesday.
 Ezra LeBroke and Ernest Stone are cutting pine for Mrs. Lizzie Jewett.
 Lulu Wing and Susie Morse and two children called on Annie Hazelton, Monday afternoon.

LOCKE'S MILLS.
 C. E. Stowell was in Bethel, Thursday. Mr. and Mrs. B. F. Maxim were in Lewiston, Saturday.
 Mr. and Mrs. D. B. Grant are spending the week in Portland.
 I. I. Young of Waymouth, Mass., is visiting his sister, Mrs. James Crocker.
 Mrs. James Crocker and Mrs. David Foster were in Bethel one day last week.
 Lena Small went to West Paris, Friday night. She returned home Saturday night.
 Mrs. Axel Bryant is spending a few days with her mother, Mrs. D. F. Foster, at East Bethel.

Mrs. O. W. Mason, Miss Alice Mason, Miss Luella Boothby of Bethel, spent Thursday with Mrs. F. A. Frost.
 A supper and entertainment for the benefit of the minister, Mr. Banghart, of Bethel, will be held in Mt. Abram hall, Thursday evening.
 Lorna Littlehale's little sister, from Bethel, is spending the week with her at the home of Mrs. Ira Swan. Miss Littlehale spent the Sabbath in Norway.

EAST SUMNER.
 Levi Bryant has been visiting his daughter, at Rumford.
 Arthur Allen has finished the cord wood job on Hedgogh Hill.
 Eldon Tucker has finished his cord wood job for E. L. Brown.
 S. W. Bean, with three men, are getting shovel handle blocks off the land of F. W. Bonney.
 F. S. Palmer and H. W. Bonney are engaged in reducing wood piles by means of gasoline power.
 R. G. Stevens has purchased the mill and feed business of F. L. Warren, Carl M., his son has returned from Portland, and will assist in carrying on the business.

Rev. F. M. Lamb, the Baptist pastor, has returned from Boston, where he has been engaged for three weeks as a singer in the Chapman-Alexander Revival meetings. He reports that the number of converts will exceed 5000.

OXFORD.
 Mrs. C. S. Hayes is in Augusta.
 Dr. E. B. Holden is ill with the grip.
 Mrs. William Robinson is ill with the grip.
 Lizzie Coulton spent part of last week in Boston.
 Jobb Roys is very ill with heart trouble.
 H. S. Denning was home from Hebron over Sunday.
 Mrs. Clinton Bumpus went to Lewiston, Saturday.
 Mr. and Mrs. Coolidge of Upton were in town Monday.
 Dance in Robinson hall Saturday evening, February 27.
 Gussie Wardwell and Vera Kay went to Norway, Friday.
 Mr. Graham of Bates college preached at the Methodist church Sunday.
 Grace Warren of Welchville spent Sunday with her aunt, Mrs. W. R. French.
 W. E. Bumpus of the Moxey farm, Mechanic Falls, was in town Monday.
 Mrs. Geo. Seiders, Jr., of Portland is visiting her mother, Mrs. H. E. French.

Mrs. Geo. Andrews of Portland is the guest of her sister, Mrs. Louise Richmond.
 The intermediate and primary schools closed last Friday; the high school closes Feb. 28.
 Everett Cook of Bates College spent Sunday with his parents, Mr. and Mrs. James Cook.
 Bernice Hanscom of Reading, Mass., has been the guest of her aunt, Mrs. W. S. French.

The Harsey Guild met at the Congregational church Tuesday evening; they are studying art.
 Joseph Robinson of Andover, Mass., spent Sunday with his parents, Mr. and Mrs. J. B. Robinson.
 Mr. and Mrs. Leon Walker of Portland spent Sunday with their parents, Mr. and Mrs. Elmer V. Walker.
 The Brotherhood of St. Paul will serve an oyster supper in the Methodist vestry Friday evening, Feb. 28.

Leonard Bowie, Walter Holden, Walter Wood and B. E. Flood attended the ice races at Lewiston, Friday.
 Mrs. J. B. Robinson and Oona Whyte have gone to Jacksonville, Florida, for the remainder of the winter.
 The sale and entertainment given by the Ladies' circle of the Congregational church was well attended. Mrs. A. N. Lewis of Bangor gave a very pleasing lecture in the afternoon.

WATERFORD.
 Elsie York has been caring for Susie Goodwin at Son Waterford.
 John Kneeland has returned home after a few days' stay at Lewiston.
 W. J. Olmstead and family have visited his wife's sister, Sadie Pennock.
 Grace McKinnay was at home over Sunday and returned to her school on Monday.
 Sadie Pennock and her little daughter, Belle, and her mother-in-law, Mrs. Pennock, were at C. B. Learned recently.

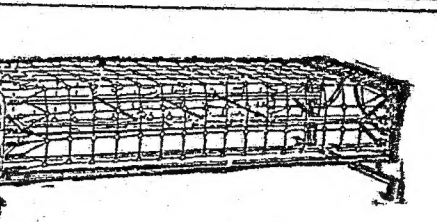

Will Davis has laid away a horse.
 The school in Pummer Hill district closed Friday.
 Llewellyn Millett's boys are hauling wood to the flat.
 W. V. Kneeland is hauling timber to Bear Lake for Ed Emerson.
 Horace Allen visited his cousin, Charles Kingman, Sunday.
 Blanch Wood is at work for Bessie Hamlin of South Waterford.
 John Grover and Leon York are cutting pine for George Stevens.
 Mr. and Mrs. Harry Dean returned to their home at Norway, Monday.
 William Stone and his grandson, Rob Heath, was in Harrison, Tuesday.
 Sadie Pennock spent the day with her mother, Augusta Learned, Tuesday.
 Mr. and Mrs. Herbert Whitcomb spent Sunday with Mr. and Mrs. Walter Shaw.
 Addie Olmstead and Mrs. L. L. Pennock was in Harrison on business Tuesday.
 Mr. and Mrs. Herbert Whitcomb visited Mr. and Mrs. Horace Allen Wednesday.
 Dr. John Douglas, daughter and grandchild, have returned to their home in Amesbury.

WEST SUMNER.
 Mrs. G. W. French has been on the sick list.
 W. W. French has been to Norway on a business trip.
 Lion Farrar is working for W. E. S. Skillings.
 C. M. Bucknam lost a work horse.
 Chancy A. Bucknam has been working for W. W. French.
 Fred Wing has been on the sick list.
 Mrs. Nell Rowe and Mr. D. A. Rowe of Redding, went to West Paris, recently.

Guy Heath is sick with the mumps.
 Mr. Atwood of Norwood, Mass., is visiting his son, Dr. F. H. Atwood.
 Geo. L. Curtis is driving a team to West Paris for Cummings & Ellingwood.
 Mr. Dale and wife of Milan, N. H., who have been stopping a number of weeks with her sister, Mrs. Alger B. Wheeler, returned Tuesday.

The rain, Friday and Saturday with the deep snow, made the traveling bad, and there was but little passing. The water came up in the streets. We hope it will raise the streams so there will be water to run the saw mill, as there is an abundance of lumber to be sawed.

The fortnightly Aid was well attended Friday night notwithstanding the heavy rain, 46 couples responded. It was a masquerade and the most of the dancers were masked. Oyster supper was furnished by Mrs. Ethel Chandler, President of the Aid, and Sister Mrs. Barrows.

This Bed Couch
 COMPLETE WITH ELASTIC FELT MATTRESS PAD AND BOLSTER

Sanitary Steel bed Couch—the couch guaranteed to easily hold 800 pounds. The spring construction is the famous "National Link" fastened to the frame at each end by coil springs, thus combining strength and comfort. The frame is finished in bronze and the bars, posts and rails are securely welded and riveted in such manner as to give the maximum of strength. Fitted with the best metal castors. With the sides dropped and the pad, bolster and cover in place you have a handsome, spring-edge couch which is easily converted into a single or full size bed by raising one or both sides. The wings are automatically locked when raised.

The Mattress and Bolster are of clean, sanitary, material. The mattress has square box edges, a soft yet compact and durable pad which conforms to the couch in any position.
 The couch is 74 inches long. When open it is 50 inches wide and when closed 30 inches.

NORWAY AND VICINITY.

Dr. and Mrs. Drake Entertain.
On Saturday evening, February 20th, a company of people met at the home of Dr. E. F. Drake on Pleasant street. The number included Principal and Mrs. P. E. Hathaway, Herman L. Howe, Myrtle Blackwood, Caro Beveridge, Rose Beveridge, Susie Wheeler, Harriet Abbott, Harriet Cragin, G. Rutledge Gardner, Lizzie Lasselle, Melvinia Green, Sarah Freeman, Goldie Frost, May Chaffin, Janet Russell, Alice Gammon, Westbury S. Stanley, Mr. and Mrs. Charles P. Barnes, and Caroline Hayden of Haverhill, Mass. The hospitality of Dr. and Mrs. Drake and Mrs. Hayden was appreciated by all the "school people."

The evening was spent informally and included a musical program of songs, contributed by Misses Wheeler and Rose Beveridge. During the refreshment hour, Mr. Barnes found at his place a mysterious package, which when opened proved to be a very beautiful ring set up in a green tourmaline—a Maine gem.
This ring was the gift of the entire corps of Norway teachers, given in remembrance of the faithful and efficient work of Superintendent Barnes. It is needless to say that the receiver was greatly surprised and very pleased with the gift. The teachers presented Mrs. Barnes with a bouquet of carnation plinks.
It was greatly to be regretted that the condition of the roads was such as to prevent several of the teachers from being present. It was a very delightful occasion.

The Calico Ball.

The Calico Ball given by the Verander Club, took place Thursday evening, Feb. 18th. There was a large number present with about ninety couples on the grand march, led by Mr. and Mrs. John Gullinan, and many more joined in the dance after the march. Stearns' Orchestra furnished the music.

At intermission, ice cream and cake were served by the ladies of the club. This was the sixth annual ball and was looked forward to by many, as this is one of the occasions where, most particularly, young and old join in for a good time, and everyone did thoroughly enjoy the dance.

EAST SUMMER.

Union Grange, East Summer, is doing good work, and having large attendance at all of its meetings. At their meeting February 13, 100 responded to roll call, and members from Mt. Grange, North Buckfield, were present, by invitation also visitors from West Paris Grange. Enlarging the hall will be the next thing in order. The lecturer's hour was open to the public, and consisted of music, readings, and a dialogue in two acts. The secretary and assistant steward were absent on account of sickness, and at this writing brother Geo. E. Morrill has been critically ill. At the next meeting, Worthy State Master Stetson will be the guest of honor.

One Million Dollars for a Good Stomach.

This Offer Should be a Warning to Every Man and Woman.

The newspapers and medical journals recently have had much to say relative to a famous millionaire's offer of a million dollars for a new stomach.

This great multi-millionaire was too busy to worry about the condition of his stomach. He allowed his dyspepsia to run from bad to worse until in the end it became incurable.

His misfortune serves as a warning to others.

Everyone who suffers with dyspepsia for a few years will give everything he owns for a new stomach.

Dyspepsia is caused by an abnormal state of the gastric juices. There is one element missing. The absence of this destroys the function of the gastric fluids. They lose their power to digest food.

We are now able to supply the missing element—to restore to the gastric juices their digestive power, and to make the stomach strong and well.

We know that Rexall Dyspepsia Tablets will positively and permanently cure disordered stomachs, indigestion and dyspepsia.

We want you to try them and will return your money if you are not more than satisfied with the result.

Price, 25 cents. Only at our store, or by mail. F. P. Stone, Norway, Me.

Facts For Sick Women

We know of no other medicine which has been so successful in relieving the suffering of women, or secured so many genuine testimonials, as has Lydia E. Pinkham's Vegetable Compound.

In almost every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound. Almost every woman you meet has either been benefited by it, or knows some one who has.

In the Pinkham Laboratory at Lynn, Mass., are files containing over one million one hundred thousand letters from women seeking health, in which many openly state over their own signatures that they have regained their health by taking Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Vegetable Compound has saved many women from surgical operations.

Lydia E. Pinkham's Vegetable Compound is made exclusively from roots and herbs, and is perfectly harmless.

The reason why it is so successful is because it contains ingredients which act directly upon the female organism, restoring it to healthy and normal activity.

Thousands of unsolicited and genuine testimonials such as the following prove the efficiency of this simple remedy.

Minneapolis, Minn.:—"I was a great sufferer from female troubles which caused a weakness and broken down condition of the system. I read so much of what Lydia E. Pinkham's Vegetable Compound had done for other suffering women, I felt sure it would help me, and I must say it did help me wonderfully. Within three months I was a perfectly well woman."

"I want this letter made public to show the benefits to be derived from Lydia E. Pinkham's Vegetable Compound."—Mrs. John G. Moldan, 2115 Second St. North, Minneapolis, Minn.

Women who are suffering from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

CHIMNEY OF CONCRETE.

Advantages Claimed For New System of Block Construction.

A Brussels inventor has devised a novel system of construction of concrete chimneys, in which, although the concrete is in blocks, re-enforcement is used, says Popular Mechanics. One of the most interesting features of the method is the fact that the chimney can be built without the use of scaffolding.

The concrete blocks are of large size, permitting rapid construction, and the provision for securing the taper in the chimney construction is particularly ingenious. The cast iron sides of the molds in which the blocks are made are in three pieces only, and the ends of the molds are formed by wooden stop blocks. By adjusting the position of these stop blocks the length of the concrete block can be altered to suit the course in which it is placed, thus securing the taper of the chimney without multiplying the number of molds. The chimney is polygonal in cross section and may be built with six, eight, ten, twelve or more sides, according to the size of the structure.

The diagram, which shows a partial cross section of the chimney, illus-

trates a V shaped cross section. This leaves a V shaped groove in the block, in which a rod or wire may be placed. It is claimed that there is no difficulty in proportioning the re-enforcement to the stresses to be sustained, and it is obvious that the vertical rods are so placed as to be less exposed to the interior heat than is ordinarily the case.

Electric Sparks For Cancer.

"Fulguration" is the name proposed for the method of dealing with cancer that has been worked out by Dr. de Keating-Hart of Marseilles. Lack of results with X rays and other light radiations decided him to try high frequency electric currents of very high tension, and the spark rays generated prove active in destroying the tumor mass and stimulating the surrounding tissues to absorb the dead tissue and to form firm scars. Quite weak currents are used, with a tension as high as 250,000 to 300,000 volts. As much of the tumor is removed by cutting as practicable, and the sparks are applied where malignant tissue seems to be left, the application lasting about forty-five minutes. The process being painful, anaesthetics of noninflammable kind are necessary. Some medical experts who have investigated report that this method is a real advance, several apparent cures of cancer having resulted, while undoubted palliative and temporary effects have been achieved.

Origin of Ozone.

According to Messrs. Henriot and Bonysy, ozone is produced by the ultra violet rays of the sun in the upper atmosphere, and the amount contained in the air near the ground increases when air currents descend from the upper regions. Sometimes also it increases during rains. It has been observed that there is a reduction of the proportion of carbonic acid in the air when the amount of ozone increases. This is regarded as an indirect effect due to dilution of the lower air by the purer air descending from above.

An Indelible Ink Tree.

An indelible ink tree, known to botanists as Semeacarpus anacardium, is chiefly found in India, but grows also in North Australia and the West Indies. Its nut supplies the natural marking fluid. When dried for commerce the nut is heart shaped and nearly black and contains a black viscous juice. For marking linen or cotton this juice is mixed with quicklime. It can be made into a marking ink by treating the nut with a mixture of alcohol and sulphuric ether and is also used for black varnish.

Welding Copper to Steel.

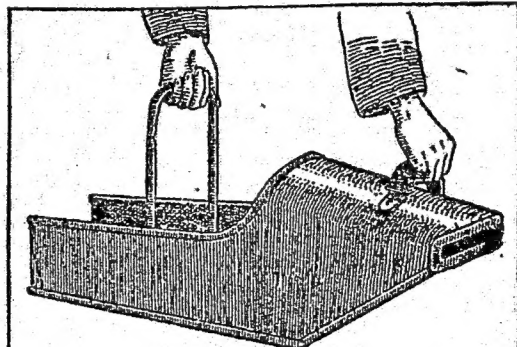

A Pittsburg company has begun the manufacture of a composite metal which is none other than the welding of copper or brass in any thickness to steel. The welding process has been under development by the company for many months, and it has been so successful that orders are already being received for good sized quantities of the new metal. The idea is to manufacture steel sheets of ordinary thickness and weld them to thin sheets of copper, thus giving the stability of steel to the sheet and at the same time practically the same wearing or non-corrosive features of copper.

NEW BRICKLAYING TOOLS.

Fountain Trowel and Packet System Tend to Expedite Work.

Two improvements recently made in the bricklaying art are noted with interest, says Brick. One is called the fountain trowel, and the other is a packet system of handling the bricks. The trowel is a metal can; shaped something like a Dutch wooden shoe. The heel is used to scoop up mortar from the mortar box, and the toe has a long opening the entire width of the can, through which mortar is poured upon the brick. This trowel or can makes it possible to spread a far greater quantity of mortar within a given time than the ordinary trowel and permits the bricklayer to use mortar sufficiently soft to fill the joints better, not only because it runs down into the unfilled joints of the course below, but also because it permits the shoving of the joints full of mortar in the course that is being laid.

The packet is a little wooden tray thirty inches long and the width of a brick. The bricks are placed on the

THE FOUNTAIN TROWEL.

packet, face up, in two rows of ten each, a weight of about ninety pounds. The whole is placed on specially constructed wheelbarrows and wheeled to the place where the men are working. The packet is then lifted from the wheelbarrow, placed on the stock platform of the scaffold and pushed over to the bricklayer. The bricklayer lifts the packet and deposits it on the wall. The last step, that of placing the bricks in the wall, requires but the moving of the arms and hands.

Every one who has watched a bricklayer at work has noticed that he tosses a brick about in his hand before laying it. This is not mere play, but the necessity of grasping it in such fashion that he can lay its best face for the face of the wall. With the packet system the best face is always upward, and the bricklayer is spared this waste of energy and time.

WEST LOVELL.

Curtis Libby was at home from Parsonsfield, Sunday.

Mr. and Mrs. Alonzo Libby have visited at West Brownfield.

Harry Pearl has bought a nice pair of team horses and parties in Hiram.

L. L. Thompson has a very lame ox. Mr. Thompson is a worker and has a lot of teaming to be done so it is putting him back. He has bought another pair of calves.

Mr. and Mrs. Walter Richardson visited relatives at the river side near the village Sunday. Mr. and Mrs. P. Day of Cornish, visited Mr. and Mrs. Freeman Days.

Mr. and Mrs. Tobias Libby made Mr. and Mrs. Joshua Libby a pleasant call Sunday afternoon. Mr. and Mrs. Thomas Libby visited at their son's, Tobias Libby's. Vesty Libby called on Mrs. Lizzie Libby. Mrs. H. Libby made a short call upon Mr. and Mrs. J. T. Libby.

BETHEL.

Middle Intervale.

Harry Hurley of Hanover, is working in the pine woods here, for Mr. Bartlett.

We recently received a fine mess of choice apples from the hand of Edward Copen.

Moll Bean and wife, Mrs. Will Holt, and Bertha Cole called at the boarding house of Z. W. Bartlett, and said they had some nice doughnuts made by the orok there. Joseph Fairbanks of Lockes Mills, is bookkeeper at the Bartlett office.

MI-O-NA

Relieves Stomach Misery Almost Instantly.

If the food you ate at your last meal did not digest, but laid for a long time like lead on your stomach, then you have indigestion and must act quickly.

Of course there are many other symptoms of indigestion, such as belching up of sour food, heartburn, dizziness, shortness of breath and foul breath, and if you have any of them, your stomach is out of order and should be corrected.

MI-O-NA tablets have cured thousands of cases of indigestion and stomach trouble. If you have any stomach distress, MI-O-NA will relieve instantly.

But MI-O-NA unlike most so-called dyspepsia remedies, does more than relieve; it permanently cures dyspepsia or any stomach trouble by putting energy and strength into the walls of the stomach.

A large box of MI-O-NA tablets costs but 50 cents at Noyes drug store and are guaranteed to cure or money back.

When others fail, MI-O-NA cures. It is a product of flesh when the body is thin; it cleanses the stomach and bowels; purifies the blood and makes rich red blood.

trout that may be taken in lakes and ponds at
nine inches.
HARRY M. BIGELOW, Sec'y.

LEGISLATIVE NOTICE.

The Committee on Inland Fisheries and
Game will give a Public hearing at its room
Office of Fish and Game Commissioners at the
State House in Augusta.
February 26, 2 p. m.
On petition of A. Corlidge and others of
Grafton and vicinity, asking that the throwing
of sawdust into Cambridge River, in Upton
and Grafton, be prohibited.
HARRY M. BIGELOW, Secretary.

NOTICE

Notice is hereby given that Arthur G. Ed-
wards of Harrison, Maine, has notified Norway
Savings Bank in writing that his book of de-
posit in said bank, numbered 12129 has been
lost, and that he desires to have a duplicate
book of deposit issued to him.
NORWAY SAVINGS BANK.

ROAD DRAGGING COST

Why King System Is Cheapest
as Well as Best.

IT BECOMES MERELY A CHORE

By Quitting a Little Earlier a Farmer
Can Easily Renew His Boulevard.
Proof of Winter Dragging's Value.
Comparison of Cost.

[Copyright, 1907, by D. Ward King.]
The cost of putting the King system
in operation is a matter which must
have consideration. Cost always is
important.

When one first hears about road
dragging he feels certain a mistake or
an exaggeration is somewhere snugly
concealed, and an active brain spends
a certain period searching for its hid-
ing place. Convinced at last of the
drag's achievements as a wonder
worker, the same brain asks, "What
is the expense?" and again is skeptical
when the answer comes. "The cost of
the new system is many times less
than that of the old system."

For the farmer who drags the half
mile or more, as may be, from "his
own front gate to his neighbor's front
gate toward town," there is no ex-
pense account. With the drag in the
road at the front gate, he quits a little
early at noon or in the evening, as
the condition of the road soil decides,
hitches to the drag and renews his
boulevard. It becomes merely a chore.
A neighbor of mine says, "After a fel-
low once gets into the fashion of drag-
ging it sticks to him like a bad habit."
For myself, I have been riding a drag
since the spring of 1896.

In the fall I can take a team from a
corn wagon at the crib and drag my
half mile stretch before the corn is un-
loaded, and in the winter months most
farmers can find an abundance of leu-
re in which to drag, and the operation
possibly is of as much benefit in the
winter as it is in the summer. In this
latitude (near the Missouri-Iowa line)
we find two conditions of the road in
winter when dragging is remarkably
effective. One of these special condi-
tions is when a rough and frozen road
is thawed an inch or more in depth
at about 4 o'clock in the afternoon.
Another favorable opportunity is at
the close of a warm spell when the
wind changes to the north and the
mud begins to stiffen with the chill.

If the mud is dragged just before a
freeze the road of course remains
smooth until another thaw, and the
difference between such a road and
one which was permitted to "freeze up
rough" is as marked as the difference
between deep mud and a dry road.
On the one you can skim along at any
speed; on the other you must move at
a snail's pace, with the horses gingerly
picking their steps and the vehicle
bounding around as if you were riding
over a fresh blast in a rock quarry.

Let me offer two paragraphs from
the Record, Hampton, Ia., the first
showing the skepticism often met, the
other confessing a radical change of
opinion and furnishing proof of the
value of dragging in the winter
months. The writer addressed a good
roads meeting at Hampton Nov. 28,
1905. Under date Nov. 28 in the course
of an extended report of the meeting
the Record said:

"It is to be regretted that there was
no split log drag at hand that he could
make a satisfactory demonstration
with, the one available not being in
accordance with the requirements, and
the attempt to show its workings were
of little or no benefit."
But in the issue for Dec. 9 the Record
admits the inaccuracy of its first
impression in the following paragraph,
the kernel of which is found in the
last sentence of the quotation:

"The King drag that we have here
in town is being used today on our
streets, and if we had teams enough
and drags enough Hampton would
have good roads within the city limits
tomorrow, whereas for a week they
have been practically impassable for
the reason that the ground froze up a
week ago last night, leaving the roads
all cut up. And suppose that every
man in the county had had a King
drag, costing about \$2, and had drag-
ged the road in front of his premises
once over and back a week ago Tues-
day, the afternoon that Mr. King spoke
at the courthouse, we would have had
good roads ever since. This is demon-
strated by the fact that wherever on
our streets the drag was used that af-
ternoon has been a smooth track ever
since."

So much for the value in the winter
of the winter dragging.
But winter dragging prepares the
way for lessening the cost of spring
and summer dragging, because if the
roadway has this winter preparation
it will generally dry off and be ready
to drag before the adjoining fields dry
out and are at it to be plowed or cul-
tivated. And so another series of leisure
hours is provided for making good
roads, without money.

I would rather drag half a mile of
road for a year than water three horses
for a year.

If I should try to strike a balance for
the twelve months, it would be some-
thing like this:

Balance in favor of the drag.....\$175.00
The last item will perhaps need ex-
planation. The figure is based on an
estimate that our family will average
one trip per day to town and that
there is an average of ten other teams

per day passing. For good measure I
cut in half the benefit to neighbors.

Hon. Matt Hall, now warden of the
Missouri penitentiary, was a wood
dragger before he left the farm. In a
published statement he tells of begin-
ning his work in deep mud. In two
months he had a half mile of road of
which he said: "I can hardly believe
my own eyes when I look at it. A
loaded wagon won't make any more
impression on it than it would on a
floor. I don't believe I have spent a
half a day on it altogether, and, hon-
estly, I wouldn't near take \$50 for the
comfort it has been to me and my
friends and neighbors." You will note
that Mr. Hall's estimate of benefit is
about double mine.

A comparison was recently made
which showed by figures taken from
many counties and from Maine to
Minnesota that a dollar spent under
the new system would produce as
much benefit as several hundred dol-
lars spent the old way. It is hard to
accept such conclusions, yet the fig-
ures bear investigation and analysis.

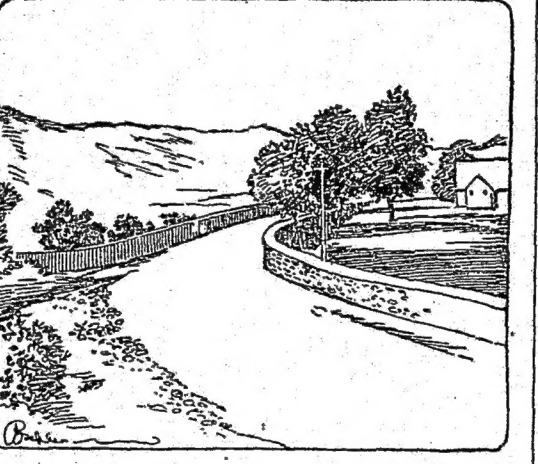

LIKE A ROMAN ROAD.

How a Chicago Millionaire Uses Rocks
on His New Hampshire Farm.

J. Gleesner, the Chicago millionaire,
who has made his summer home in
Bethlehem, N. H., for the last twenty-
four years, is rapidly attaining fame
as a road builder, says a Bethlehem
correspondent of the Chicago Record-
Herald. He is now able to show three
miles of probably the finest road in
White mountains, all within or adjoin-
ing his own estate and all public road,
although it was all built or built over
by Mr. Gleesner at his own expense.
During the late autumn he had con-
structed a half mile of road on the
main highway from Bethlehem to Lit-
tleton and during most of that time
had a crew of seventy men, thirty
horses and twenty oxen engaged on
the work. Part of this road looks like
pictures of the modern French or the
old Roman roads, and it is built fully
as solidly as the Roman roads used to
be—in fact, after the same plan.

The most important work done on
the Littleton-Bethlehem road by Mr.
Gleesner this year has been an ex-
tensive fill of quite a stretch of road
over some lowland where had travel-
ing had generally been the rule. At
the lowest place the road was filled in
six feet with stone, and the stone
wall on each side was carried three
feet higher, the wall in places being
ten feet higher on the back side, or
side toward the fields. The wall is
three feet wide on top and is strong-
ly built.

The road is twenty-five feet wide be-
tween the walls, and four teams by

CURVED WALL AND ROADWAY WHERE A
SIX FOOT FILL WAS MADE.

actual test can pass abreast. This
wall extends for 400 feet and at one
part describes a beautiful curve. Un-
less it is desired to make a fill an ex-
cavation of several feet is first made,
and Mr. Gleesner's men and oxen then
begin to dump in immense stones tak-
en out of the nearest fields. A fairly
level course is made of these, and then
another layer of somewhat smaller
stone is dumped on.

Then comes a still smaller layer, and
then, last, the stonewall is leveled up
and all openings are filled in with very
small stone, so carefully and thorow-
ly placed that animals can be driven
over without hurting their feet. Then
the rock is entirely covered and the
road finally shaped up with a good
layer of "hardpan," which packs solid
and is practically impervious to water.
Drainage at each side is always pro-
vided for, the roads are well rounded,
and these features, combined with the
solid foundation of rock underneath
and the impervious layer on top, give
an ideal road.

International Road Convention.

It is announced that the minister of
public works of France has been au-
thorized to call an international con-
vention in his country in 1909 for the
purpose of considering methods to pre-
vent roads from being damaged by ex-
cessive automobile traffic. The use of
the automobile, it is claimed, has pro-
duced many new problems in connec-
tion with the splendid roads for which
France has become famous, and a plan
for their construction and maintenance
is deemed necessary. The delegates
will therefore in particular discuss
methods of adapting present roads to
the new conditions of traffic.

Canada's Interest in Good Road Plan.

D. Ward King of Mattland, Mo., who
is the head of the rural improvement
department of the American Civic as-
sociation, has a drag log method for
obtaining good roads at the least ex-
pense which is being adopted in the
Canadian provinces. The Farmers Ad-
vocate of London, Ont., is offering \$100
in prizes for the best roads made with
a King drag. In a personal letter the
editor wrote: "A widespread interest
has been added and many drags con-
structed in addition to those used by
our contestants. So far we are more
than delighted with what we have seen
and heard of the results."

Different Now.

Trotter—Windig used to be a great
fellow to blow his own horn. Does he
still keep it up?
Homer—Oh, no. He has a chauffeur
now—Town Topics.

ARMORED FIRE DOORS.

Metal Covered Wood Displacing Iron
and Steel.

Consul Church Howe, sends from
Manchester the following description of
the place of the iron door in British
warehouses and factories:

Within the last few years a great
change has been taking place in the
materials employed for the construc-
tion of fire resisting doors. Formerly
it was supposed that these doors must
be made of iron or steel, and, although
doors made of these materials were
often found useless owing to their li-
ability to buckle and consequently to
tear themselves, from their fastenings
when exposed to extreme heat, it is
only comparatively lately that a really
effective substitute has been discovered.

Although the iron door is still made
use of occasionally in all classes of
buildings and, I understand, with com-
parative frequency in Manchester ware-
houses, one finds that in buildings de-
signed for manufacturing purposes and
especially in textile factories the ar-
mored door is rapidly taking its place
and giving satisfaction.

The armored type of fire door is con-
structed of several thicknesses of well
seasoned pine boards, planed, tongued
and grooved and nailed together with
wrought iron nails driven flush and
clinched on the other side.

The wood is then completely covered
with thin steel sheets of not less
than No. 20 standard wire gauge, each
sheet being of a limited size, lock-
jointed and fitted close to the wood,
so that, while free to expand, they
exclude the air and cannot become de-
tached.

By this means combustion is pre-
vented, and it is found that an expo-
sure of several hours to the fiercest
heat results only in the surface of the
outer boards becoming slightly car-
bonized to the depth of a fraction of
an inch.

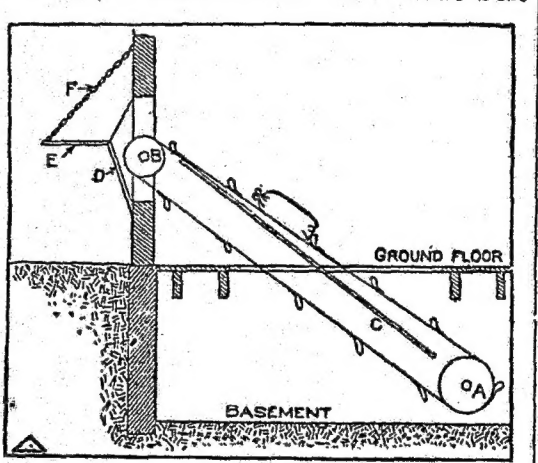

SACK CARRIER AND LOADER.

Simple Device For Elevating and
Loading Mill Refuse.

A cheap and easily constructed sack
carrier and loader for carrying screen-
ings and other stuff out of the base-
ment of a mill to the ground floor and
for loading sacks on the delivery wag-
on can be made from an old belt and a
few pulleys.

The drive pulley A is on the shaft
of a jack and is thrown in gear by
pulling a rope hung in the most con-
venient place on the ground floor. This
rope is attached to a lever in the
basement that straddles the shaft
on which pulley A is attached and
bears against a collar on the shaft. A
spring placed between the bearing and
a collar on the end of the shaft is used
for the release. When the rope is
slackened the spring pulls the shaft
out of gear. In this manner the sack
carrier is thrown in or out of gear in-
stantly.

The driven pulley, or the return for
the belt, is shown at B. If a wide belt

SACK ELEVATOR.

is used and there is no wide pulley of
small diameter at hand use two small
pulleys together.

The lugs are made by attaching to
the belt pieces eight or ten inches long
cut from an old six inch belt and dou-
bled, allowing them to roll up. They
are fastened by means of elevator
nuts, with the nuts on the top side.
The roll will roll back over the nuts
and prevent them from tearing or
touching the sacks. A hardwood
board, C, is placed in such a manner
that the upper end is nearly flush with
the face of the pulley B, and the lower
end points to the center of pulley
A. This will allow the weight of the
bags to act as a tightener on the belt
by sagging it down. This takes up
any slack in the belt and prevents
slipping.

A hopper, D, is built on the outside
of the building. The lid of the hopper
is thrown down and held by
chains F. The lid of the hopper E
forms the top when closed.—American
Miller.

The Great Rose Family.

A recent flower show at Regent's
park, London, included 2,000 varieties
of roses, and it was stated that 450
new varieties have been added to the
great rose family in three years. A
nearly black rose was shown, with the
assurance that the long sought blue
rose would be brought out soon.

How to Make Baked Apple Pudding.

Half a loaf of breadcrumbs, to which
add a little salt. Pure, core and cut
into thin slices two greening apples,
four ounces of chopped suet, half a
cupful of boiling water sufficient to
moisten the mixture. Rub a little salt
on the inside of the mold to make it
smooth. Pack the mixture firmly as
tightly as possible into the mold. Fasten
the lid down securely and place in
a boiler with only sufficient water in
the bottom to make a steam. Let it
boil this way for one hour, turn out
and eat with the following sauce:

One cup of granulated sugar, quarter
of a cup of water. Put together on the
fire and allow to melt quickly, to which
add the rind of half a lemon chopped
fine, not grated. One minute after the
suet begins to boil (kept any longer it
turns to candy) remove it and add the
juice of half a lemon. Serve hot.

How To Gain Flesh

Persons have been known to
gain a pound a day by taking an
ounce of Scott's Emulsion. It
is strange, but it often happens.

Somehow the ounce produces
the pound; it seems to start
the digestive machinery going
properly, so that the patient is
able to digest and absorb his
ordinary food which he could
not do before, and that is the
way the gain is made.

A certain amount of flesh is
necessary for health; if you
have not got it you can get it
by taking

SCOTT'S EMULSION

four cents to cover postage, and we will send you
a "Complete Handy Atlas of the World."

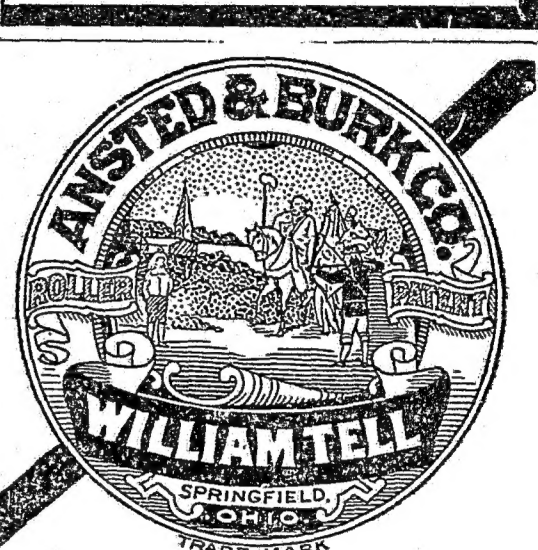

SCOTT & BOWNE, 409 Pearl St., New York

Stop Sneezing

That's the first sign of a cold. Save an ex-
pensive sickness by checking it before it be-
comes dangerous. Thirty-five cents spent
today on a bottle of the true

"L. F." Atwood's Bitters

may save you thirty-five dollars later on. Re-
lief follows the first dose. They cleanse the
bowels, relieve congestion, remove conditions
that often lead to prolonged illness. Put your
faith in the good old family remedy and you'll
seldom know sickness. At your dealer's, 5c.

If you are particular
about your flour, here is one
just made for you.

Made from richest Ohio wheat, stored
in sealed tanks and cleaned numerous
times before grinding. Tested
every half hour at the mills.
It makes the whitest, lightest,
most appetizing bread in the
world.
